

FB4GDOME – Heavy Duty DOME MiMo Puck 4G Antenna

Description

Fullband FB4GDOME Heavy Duty 4G Puck Antenna

This is a Fullband / Wideband Panel Mount MiMo antenna ideally suited for mounting on top of metal cabinets / street cabinets. It's robust and heavy duty construction, combined with excellent radio performance make it suitable for a wide variety of installations and it can be used with 2G, 3G and 4G cellular devices as it covers the full 2G/3G/4G network frequencies. Ideal for use with our 3G and 4G Routers.

The Dome Antenna encases dual antennas so a 2G or 3G device with a single antenna port can just use one of the cables without any detriment to performance and likewise all 3G and 4G devices with two antenna ports can benefit from the MiMo antenna capability and provide antenna connectivity for both the Main and Aux antenna ports in a robust, convenient high quality antenna.

FB4GDOME Technical Specification

Frequency : 800/900/1800/2100/2600MHz

VSWR : 2.0

Peak Gain : 3dBi

F/B ratio : 8dBi

Polarizatio Type : Vertical

Rated Power : 50w

Input Impedance : 50 Ohm

Mechanical parameter

Connector Type : 2 x SMA straight male

Cable type : 2 x RG58

Length :3 Meters

Water proof level : IP67

Mounting method : Screw

Mounting Hole Diameter : 25mm (M25)

Dimensions : D143mm x 32mm

Radome Material : ABS

Weight : 1Kg

Recommended For :-

- 3G / 4G CCTV Installations
- Digital Signage- Traffic Management
- Boats / Marine
- Vehicle Roof Mounting

Date Created
